

frozen and chilled foods logistics

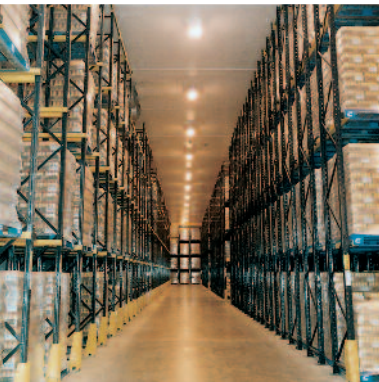

The complete service  
driven by quality

## Langdons – the complete service providers

“We meet these challenges daily on behalf of hundreds of customers.”

Langdons is a Logistics Service Provider (LSP) specialising in controlled temperature operations. Frozen and chilled palletised food and drinks account for over 99% of approximately 25,000 pallets per week passing through our operations. We offer collections from factories (or other cold storage locations), frozen or chilled storage (if required) and final delivery down to a one pallet minimum anywhere in the UK and Ireland which is accessible by LGVs. The business comprises two main divisions:

## ChillNet

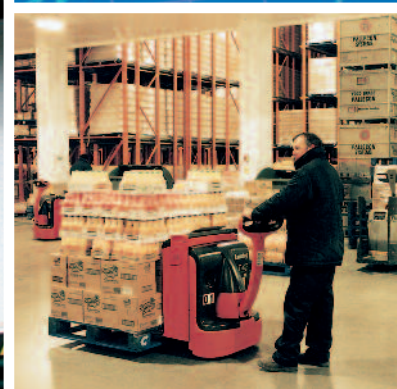

This is the name for our service delivering to Wholesalers, Food Service Depots and Manufacturing locations. Typically, consignments of just one or two pallets of frozen or chilled food products are collected on Day 1 and delivered Day 2 anywhere in the UK mainland – add one day for Ireland (north and south) and Scotland.

This is achieved by networking Langdons depots in Taunton, Luton, Peterborough, Redditch, Dover, Liverpool and Glasgow as well as partner depots in Newcastle, Doncaster, Moy (Northern Ireland), Dublin and Limerick (Eire). Most of these depots are connected directly with each other overnight using dual temperature, 26 pallet capacity articulated vehicles.

## RDC Deliveries

Our modern Bridgwater depot is the hub for our chilled service to major multiple retailer Regional Distribution Centres (RDCs) throughout the UK and Ireland. From this site there are daily departures seven days per week going to most of the RDCs. Orders received as late as 16.00 can be picked and despatched overnight and be on shelf the next day thereby meeting the exacting demands of the UK major multiple retailers.

“Up to 11,000 pallets in our chill and frozen storage facilities at any one time.”

## Rapid response – delivering the goods

Rapid response is the key to success in distribution in today's fast moving markets. Significant reductions in inventories throughout the food and drink manufacturing and retailing sectors has resulted in ever shorter lead times. Continuous replenishment is the preferred supply chain solution for most retailers today and so the timely performance of your distribution operation is now even more critical. We meet these challenges daily on behalf of hundreds of customers.

## The European network

Langdons is part of the Nagel Group, who specialise in controlled temperature logistics for the food industry throughout Europe. With more than 30 depots in Germany alone, the Group can provide integrated logistics, including chilled storage if required, for international movements down to a single pallet.

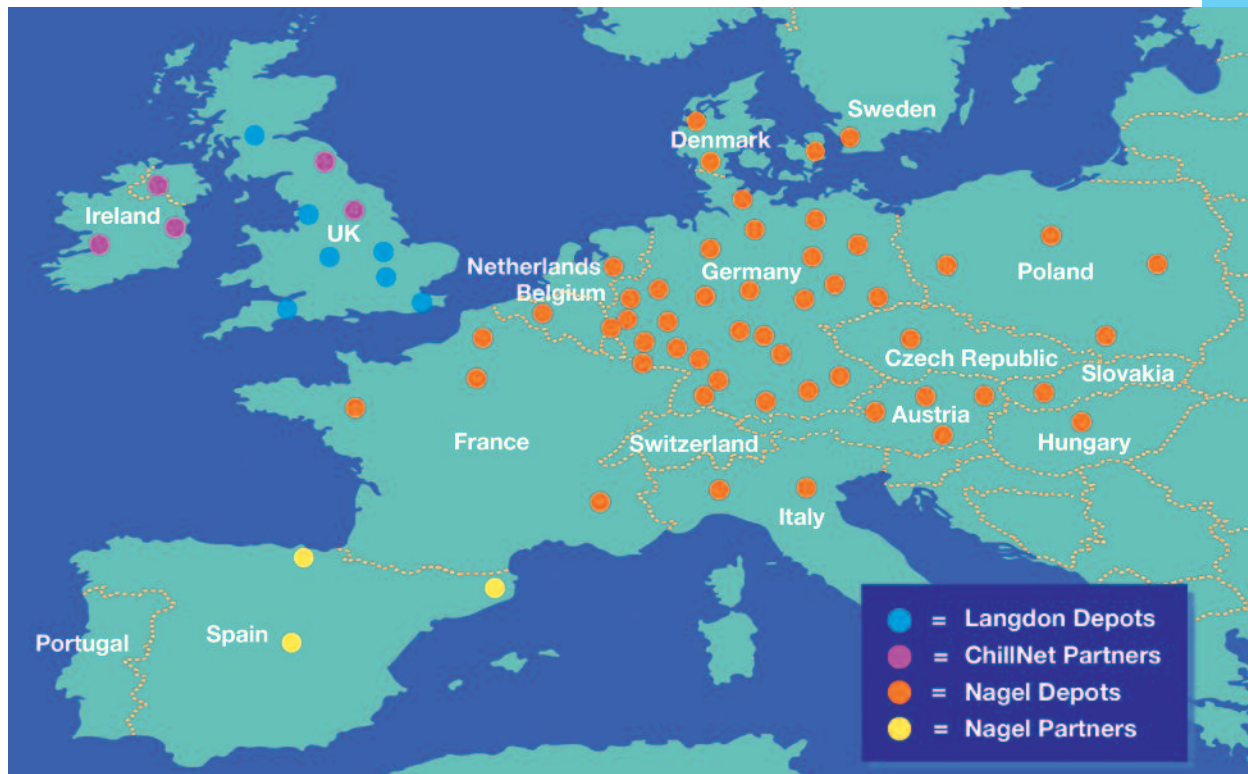

Import and export movements are routed through our depot in Dover where staff have expertise in international logistics.

Groupage pallets are routed through the network to the appropriate depot for final delivery. Full load chilled or frozen movements to and from any other EU country are also available.

## Langdons logistics solutions

- Temperature controlled transport and distribution
- State of the art cold/chill storage facilities
- ChillNet distribution network
- National and European services
- Order processing facilities
- Consignment tracking service
